

**Date of creation:** 10/June/2016

**Company:** SINGA Associates SA

**Job Title:** Junior Microsoft SQL Server & Business Intelligence Developer

**Area:** Commodity Trading & Finance

**Country / Location:** Switzerland / Geneva

### Company Description

SINGA Associates SA supplies Commodity Traders with software solutions and consulting services such as CTRM selection and implementation, business intelligence, process optimization and project management. SINGA Associates SA is mainly active in the fields of metals and soft commodities and aims to provide services with high added value to customers located in Europe and across the World.

### Job Description

We are looking for a Junior SQL developer who will be responsible for finding solutions that are able to respond in the most efficient manner to the different requirements of the business in coordination with the other members of the team.

The main duties will be structuring and designing SQL queries, ensuring their accuracy, stability, reliability, and performance. The candidate will also work with other developers reviewing and optimizing SQL statements as necessary, and establishing best practices. The candidate will be as well involved in the creation and maintenance of Business Intelligence solutions.

### Responsibilities

- Acquire business knowledge in order to provide efficient solutions
- Gather business requirements and write specifications accordingly
- Define concepts and prototypes for the solutions
- Write and optimize SQL statements and BI reports with the related documentation
- Ensure accuracy, performance and availability of the solutions
- Collaborate with other team members and customers

### Skills and Qualifications

- Strong proficiency with Microsoft SQL Server, SSRS and SSIS
- Proficient with Microsoft tools
- Skilled at optimizing large complicated SQL statements
- Strong knowledge and understanding of relational databases architecture
- Capable of troubleshooting common database issues
- Fluent spoken and written English and French

### Education

Master's degree in IT and development

### Soft skills

- Excellent communication with internal & external contacts
- Able to listen to users' needs and provide efficient solutions
- Critical thinker, attentive to details with strong analysis skills
- Highly organized, self-motivated and determined
- Proactive, and able to think "out of the box" and solve problems
